Guidelines for writing your paper

Due April 20, at 5pm by email to the instructor

1 Typesetting

You paper should be no more than 8 pages long, single-space, single-column, written with no less than 11pt font and margins as follows: left and right are no less that 1 inch, top and bottom are no less that 1.5 inch.

The first page should start with the paper title, your name and affiliation. Then should follow your *corrected* abstract.

Please submit your paper in the PDF format only.

1.1 Figures and tables

Figures and tables have to be inserted directly into text (and not in the appendix, e.g.). All the figures and tables should be referenced in text and the reference should precede (spatially) the placement of the figure.

1.2 Citations

Your paper should have citations placed directly after the phrase/word to which they refer. The citation text should be found in the References section in the end of the paper. In this section, the references are sorted alphabetically by first author's last name (or by a special "key" if there is no author in a reference.)

2 Contents

The following sections have to be present in your paper: Abstract, Introduction, Conclusions, and References. Depending on the nature of your report the other possible sections are

- Design and methodology

- Algorithm description

- Experiments

- Related work

- Discussion and analysis
